DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner agrees with the applicant in regards to the novelty of the combination of limitations.
3. For claims 1 and 4, the application teaches a method and system for verifying the hardware operation of an ASIC for TCP/IP processing by simulating the ASIC in a first computing device to communicate with a second computing device and initiate a TCP/IP connection between the two devices. The simulated device is programmed in an RTL code such as Verilog. The test further involves the monitoring of a Syn-Ack handshaking system, wherein the TCP timer is further slowed to avoid retransmission.
4. The examiner has determined that, within the environment of TCP/IP simulations, the combination of code simulation, this particular test, and the slowdown of the TCP/IP timer is novel and non-obvious in light of the specific limitations drawn in claims 1 and 4.
5. Claims 2, 3, and 6-8 inherit the allowability of the independent claims, and are therefore also allowable for the reasons above. Claims 2 and 5 further add a second test procedure. Claim 8 describes a specific embodiment and usage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard background on TCP/IP processing, RTL code, and SYN-ACK packets.
